According to some experts, King Anangpal II, taking King, lifted Delhi's iron pillar and installed in the main sanctuary of Lal Kot in New Delhi around 1050 AD. When King Prithviraj Chauhan, grandson of Anangpal, was defeated by the Eji @ Rcito Muhammad Ghori in 1191, Qutb-Din-Din Aibak erected the Quwwat-ul-Uselam Mosque in Lal Kot. The Pillar moved from its original site in front of the mosque to its current location. Characteristics Mehrauli's iron pillar is at a height of 7.2 meters. It is based on a carved foundation of 48 centimeters that weighs 6.5 tons. The Summit of the Pillar is embellished with sizes. It also includes a deep hole that is stated that it is the foundation where the statue of the Hindu Garuda was placed. Registrations are recorded on an iron pillar. The most intriguing aspect of the architecture of the Iron Pillar is that it has not oxidized more than 1600 years of exposure to the elements. Mehrauli inscription conclusion within the QTB complex is the Iron Pillar Mehrauli, also known as the Iron Pillar of Delhi or Lohe Ki lat. It was built in the fourth century or and brought to this location about 800 years later during the Sultanâa de Delhi's permit. The resilience of corrosion of the Iron Pillar after 1600 years has amazed historians, and has been linked to its great purity. The pillar has been grazed by bullets of cellar that have been shot. The hot lumps of Iron sponge so obtained were hammered to squeeze most of the slag. From the welding lines visible on the surface, the delhi p oillar seems to have been built from a large number of Bustos, with a weight of 20-30 kg, with á á á á ígo soldier together under shots with a carbon explosion. e B.Lal: The mass pillar did not melt, but was manufactured via forjad As and hammer welding bumps or hot -grass iron balls in a step -by -step process. 10. RESISTANCE TO CORROSIÓN OF THE PÍLAR e -â -â e Resistance to surprising corrosion : It has undergone corrosion. Á e -â -â e This fact has often been highlighted in accounts and articles dedicated to the iron pillar Centenal celebrations of like this e -â -â e b.b. LAL: "An examination of the buried part of the Pillar and the capital surmounting it has amply demonstrated that the iron of the Pillar is vulnerable to rusting like any other specimen of wrought iron". 11. The Rustless Wonder eÁÁEáE Technique of manufacture: Forge welded from many sponge iron pillars of different composition. so the chemical analysis and consequently microstructure as well as mechanical properties are variable from layer to layer of the pillar. eÁÁEáE Phosphorus in ferrite: exerts a beneficial influence through oxidation to phosphate which as an inhibitor promotes the formation of protective, impervious oxide films on the pillar surface. eÁÁEáE Low sulphur and manganese contents: expected to make some contribution to the increase in corrosion resistance of the Delhi Pillar eÁÁEáE Protective film coating of corrosion products. 12. Inscriptions eÁÁEáE Brief inscription by Anangpal II about the erection of the Pillar has the date 1109 'Samvat' i.e. 1052 eÁÁEáE Most significant and earliest = Six-line Sanskrit inscription in archaic Gupta Brahmi script on its upper portion. eÁÁEáE Deciphered and translated by Prinsep in 1838. eÁÁEáE Many aspects shrouded in mystery and dogged by controversy. eÁÁEáE Inscription is not dated. eÁÁEáE Refers to the conquests of a powerful king named ChandracÁÁ eÁÁEáE The dynastic particulars of Chandra are not recorded in the inscription. eÁÁEáE No unanimity amongst scholars about the exact identity and precise historical context in terms of his period or specific date. 13. Inscribed textual content The inscription supplies us the following facts about the eulogized monarch. i) He defeated his enemies in the Vanga. ii) He crossed 'the seven mouths of the river Indus' i.e., the Indus delta, and conquered the Vahlikas. iii) The breezes of his prowess were still "perfuming" the regions of the Southern Ocean. iv) He established sole and supreme sovereignty on the earth by 'the force of his own arm'ÁÁÁ. v) He ruled for a long time. vi) He was a devout Vaishnava and put up pillar as a "Dhivaja-Stambha" (Flag Staff) for Lord Vishnu. vii) His fame lingered on the earth even after his death. 14. Identification of Chandra eÁÁEáE O.Stein: Not possible to identify Chandra. eÁÁEáE James Prinsep: Chandra = Some king of 3rd/4th cent CE. eÁÁEáE Bhuu Daji: Chandra = Post Gupta king. eÁÁEáE Ferguson: Chandra = either Samudragupta or Chandragupta II. eÁÁEáE J.Fleet + R.G.Basak: Chandra = younger brother of Mihirkula. eÁÁEáE R.C.Majumdar: Chandra = Kusana king Kanishka. eÁÁEáE H.C.Raichaudhary: Chandra = Naga king. eÁÁEáE H.P.Shastri + R.D.Benarjee: Chandra = S/O King Simhavarman eÁÁEáE V.P.Sinha + H.Seth: Chandra = Chandragupta Maurya. 15. Chandra as a Gupta king eÁÁEáE Chandra = Samudragupta. eÁÁEáE The marked 'matras' or horizontal top strokes of the letters, which seems to correspond to the Bilsal pillar inscription of Kumaragupta (415- 416 CE). eÁÁEáE A.H.Dani: script belonging to early 5th cent CE. 21. Conclusion eÁÁEáE Need not be looked upon as a mystery or an enigma. eÁÁEáE Stands out as a metallurgical marvel of its age. eÁÁEáE Mode of Fabrication: Hammer forging and welding ball of hot pasty iron in many steps. eÁÁEáE Reasons for Rustlessness: Unusual chemical composition, protective oxide film, favorable Delhi climate eÁÁEáE Date of the Inscription: 380-385CE. eÁÁEáE Erected by: Samudragupta/Chandragupta II eÁÁEáE Future research: Pillar eÁÁEáE s original location & its whereabouts for some six centuries before its installation at .rallip .rallip eht noitpircsni eht gnivargne rof osla sa ,latipac tneíngam s'rallip eht gnípalhs rof desu s'lot
